A WARM WELCOME TO MARLEYCOTE...

With another year of uncertainty looming and the conference and show season in the balance, we decided to put a new herd brochure together to let our friends and fellow breeders see what we have in our shed at the moment!

We've collected a small amount of semen from some of the Changue E.T bred bulls, mainly for our own use, but with a little bit of each available to sell. Information on bull pedigrees and availability is in this brochure.

Hopefully the conference will go ahead. The first of the E.T heifers are due at the end of May and there are some interesting pedigrees and smart individuals amongst them for the delegates to view.

I hope you enjoy perusing our herd on paper, visitors are always welcome and stock is usually available for sale.

Richard

THE MARLEYCOTE DAIRY SHORTHORN & AYRSHIRE HERD

David, Shirley, Richard and Paul Baynes welcome you to Marleycote Walls.

The Marleycote herd of pedigree Dairy Shorthorns dates back more than 90 years. The dairy herd was established in 1932 by the late Geoffrey Baynes and is now managed by his grandson Richard assisted by Lewis Short. Our herd comprises of 20 Dairy Shorthorn and 90 Ayrshire cows and their dairy replacements, alongside bull beef.

Marleycote Walls runs to 165 acres, along with nearby Woodnook Farm of 120 acres. Cropping is mainly grass with 40 acres barley and 20 acres wheat for whole crop silage.
When Woodnook Farm was purchased in 1994 the dairy herd numbers were increased with the purchase of Ayrshire cows from a number of herds including Morwick & Middle. The original Ayrshire cows were a mix of pure and blended bloodlines.

The breeding policy has been to mate each cow individually to try to improve her faults, so a wide variety of pure and blended bulls are used. Although breeding the right type of cow is more important than her blended percentage, the show ring plays an important part in the breeding decisions, so if possible the aim is to keep the percentage over 50%. The aim across the herd is for a cow to last 7 - 8 lactations with an average yield of 8000 litres whilst getting her straight back in calf with minimal health problems.

Aware of the influence over many years of the noted Changue herd, in October 2017 the 1st Changue cow was bought at Borderway. Impressed with her performance, another 3 were bought in early 2018. As they adapted to life at Marleycote, they were equally impressive so a trip to Changue was organized. This coincided with an enquiry from the Osborne family from Cornwall who were looking to expand their Shorthorn herd. They selected 11 cows to join their herd. These have subsequently classified where 7 of them were EX and 4 VG as well as having considerable success in the show ring.

The trip to Changue resulted in a sizable influx of Changue Ayrshires. Today 43 Changue cows are milking, every one of them have exceeded all expectations, both in type & production, an added bonus was making an impression in the show ring. During discussions with Robert Stevenson a mutually beneficial arrangement was made to implant some of his considerable stock of embryos, resulting in 40 ET calves born last year & 40 pregnancies due this year. We continue to work with Robert developing a number of his families in their new home at Marleycote.

Having had a couple of cows from the family's West Mosgiel herd and liking their type and production, I persuaded Bryce to let us visit in August 2020 for a look around with the intention of buying a couple of cows to start new lines at Marleycote. His cows are now managed organically and the milk sold as pasture fed, not parlour fed. The calves also stay with their dams, therefore no milk records were available to help in the selection. This meant we were buying with the eye, my 1 or 2 cows ended up as 10 cows and 3 heifer calves at foot in various stages of lactation much to senior management surprise when they landed home. At the first classification visit they averaged 86points. The first of the group to calve at Marleycote was West Mosgiel Mayflower 224, she is now 92 points and giving 58 litres a day in her 6th lactation. If they all calve in like her, it was a day well spent and we are grateful to Bryce for giving us the chance to work with these great families that he and his late father worked so hard to develop.

The herd is nationally renowned for quality and over the years has an impressive show record at the country's top agricultural shows, including Northumberland County, The Royal Highland and Dairy Event. Cattle from the Marleycote Herd are also regular and successful competitors at the North East All Breeds Dairy Calf Show and the All Breeds All Britain Calf Show. The Great Yorkshire Show remains the family's favorite show, successes there include:

- *2011 Marleycote Barrington Iris winning Shorthorn Champion and Reserve Interbreed Champion.*
- *2012 Morwick Fawn added to her long list of show successes with the Ayrshire Championship.*
- *2012 Marleycote Apricot VG86 was awarded heifer Champion and Marleycote Sea Lily 21 VG87 was awarded reserve Ayrshire Champion at the Great Yorkshire Show*
- *Marleycote Songstress 20 VG86 was heifer Champion and Reserve overall in the Shorthorn classes.*
- *2015 Marleycote Brown Nell 20 EX93 took the Ayrshire Breed Champion at the South West of Scotland Dairy Show.*
- *2019 Marleycote Sea Lily 23 Ex92 2E was awarded Breed Champion at the Great Yorkshire Show*

A sale of note during 2013 was the Ayrshire cow Marleycote Sea Lily 14 and the Shorthorn Marleycote Princess Jill 31 selling to the Mclean family in Northern Ireland, both cows have won numerous breed and interbreed championships with Lily scoring 94 points and Jill at 95 points with their new owners.

2016 saw another landmark at Marleycote with the homebred Songstress 8 Ex91 3E becoming our first 100t cow, giving 101,855 with the completion of her 9th lactation. Songstress 8 is also an 8 star brood cow and twice winner of the society

Gold Cup for regular breeding and high components.

2020 saw our Marleycote Fleur 49 win the Shorthorn Society Gold Cup with the highest production figures in the history of the competition. This is the 9th time a Marleycote entry has won this competition.

Faced with the economics of milk production at the beginning of the millennium we opted to continue to pursue quality, not quantity, and add value to our milk with on farm processing. Investment in a new dairy building and mainly second hand equipment was made and Northumbrian Pedigree Milk and Cream was launched in May 2005 - at the time the only on farm processor in Northumberland. Paul took over the management of the processing side of the business. We currently sell 70% of the milk which our cows produce, in bottles. Milk is delivered to over 150 customers throughout Northumberland & Tyneside. Customers include shops, coffee shops, restaurants, Ice Cream makers & bakeries. The latest innovation is the placing of the first milk vending machine in a suburb of Newcastle. This is proving very popular with the customers and is selling considerable volumes of milk.

In 2009 the existing milking and housing facilities were becoming dated so the Baynes family decided to invest in 2 Lely Astronaut robots, along with a new purpose-built shed. This was designed with cow comfort and ease of management in mind. There are 124 cubicles, a slatted floor with 8 months slurry storage beneath and a straw yard for up to 20 cows.
The cows are fed a simple diet of grass silage, wholecrop wheat and brewers grains in winter (no feeder wagon) with an 18% nut in the robots. They are grazed through the summer and buffer fed silage. The current herd average is:

Dairy Shorthorns
8599kg,
4.40% fat,
3.45% protein

Ayrshires
8142kg,
4.44% fat,
3.43% protein

Current Classifications: *22EX, 36VG, 20GP and 4G*
Herd Health Status:
- TB 4 yr testing (last test date 28/01/21)
- BVD free and vaccinated
- Johnes Monitored
